

ASBRU Compact PRO - **NEW** **-business booster**

The ASBRU COMPACT PRO is the most production orientated and user-friendly solvent inkjet printer in its category.

Built around well-proven technology, we have re-engineered the ASBRU COMPACT PRO and with fully controllable pre-/print and post heat, the results are optimized print quality and faster production throughput.

Safe Solvent Inks Offer Low-Cost Media Options

ASBRU COMPACT PRO uses environmentally friendly organic solvent ink allowing you with almost complete media independence to print on low cost uncoated substrates for brilliant long-lasting results without lamination.

Using the Original ASBRU Solvent Ink (CMYK plus Light Cyan and Light Magenta) together with our ICC color profiles you get a solution to print vibrant photographic images and accurate spot colors onto the substrate of your choice.

The Continuous Ink Supply System (CISS)

The latest developed and patented electronic Refill-System guarantees a constant ink level in the cartridges and a correct ink supply to the print heads. The cartridges are supplied from 6 one liter easy refillable ink reservoirs.

Print & Cut - Function

ASBRU COMPACT PRO offers you Print & Cut with integrated contour cutting, which makes it easy to produce multi-coloured cutout logos in different sizes.

Take-up System

The Take-Up System for the ASBRU COMPACT PRO is now included when you buy the printer. That helps you to achieve a professional handling of the finished prints. An extra guarantee for those who intend to print after hours.

All these features make ASBRU COMPACT PRO a genuinely versatile machine that can tackle any type of indoor and long-term outdoor durable print & cut application.

Solvent printing requires ventilation

ASBRU Air - Cleaning - System. The ASBRU printer is a solvent based printer. The inks contain solvent to secure a long durability. When the ASBRU Air-Cleaning-System is installed, odour free printing is achieved making a clean and healthy working environment.

ASBRU Control Panel

The ergonomically designed and well-placed control panel makes it easy to adjust the pre-, print- and post- heating for different media.

The Continuous Ink Supply System (CISS)

The patented electronic Refill-System (optional).

Air Cleaning System

Environmental friendly, providing a cleaner and healthier working day.

Original ASBRU Ink

Outstanding print results with the original ASBRU Solvent Ink.

Technical Data: ASBRU COMPACT PRO

Media format:	54" – 1371 mm		
Print format:	53" – 1346 mm
